

# Guess Number game

guess a number with 4 digit

Add player data

Start

```
Struct player {  
  char name[];  
  int total_guesses  
}
```

```
while (player[i].total_guesses >  
       player[i+1].total_guesses  
       && i >= 0)
```

```
swap( player[i] , player[i+1] )  
i--
```

next

Number player ++

End

Save data player to file

Start

```
Struct player {  
  char name[];  
  int total_guesses  
}
```

```
for i = 0 to Number player
```

```
fprintf(player[i].name  
        , player[i].total_guesses)
```

next

End
